

## ENVIRONMENTAL POLICY

Petrov Technology EOOD implements and maintains an Environmental Management System that complies with the requirements of the international standard ISO 14001: 2015. We periodically assess the efficiency and effectiveness of EMS. In this regard we carry out: determination, planning, implementation, control and continuous improvement of all processes influencing the environmental aspects.

### THE MANAGEMENT OF PETROV TECHNOLOGY EOOD DECLARES:

#### RESPONSIBILITY FOR THE IMPLEMENTATION OF THE DECLARED ENVIRONMENTAL POLICY:

- Improving, preserving and restoring the natural environment by reducing the harmful impact on our environment of our activities and products;
- Improvement of process safety, reduction of the quantities and / or the risk of industrial waste and the commitment to prevent contamination; - minimizing or eliminating pollutants released into the environment;
- Management of the environmental aspects related to air, water, soil, personnel and society - waste /technological, household, packaging/, pollution /dust, noise, vibration oil, resources/materials, fuels, energy, water/;
- Training and awareness-raising of environmental staff and employee responsibility with regard to policy understanding and implementation;
- Making decisions to inform and discuss with stakeholders about environmental issues and the efforts made to improve it;
- Efforts to continuously improve environmental management through systematic checks, implementation of corrective actions and environmental effectiveness;
- Assessing the effectiveness, suitability and sustainability of our environmental policy through periodic reviews by management;

- Periodic analysis of national and international normative documents, their impact on production activity and continuous control over the fulfillment of all obligations imposed by these documents;
- Achievement of environmental effectiveness, expressed in measurable results from the management of environmental aspects;
- Creating a positive public image within the free market.

To achieve these strategic objectives, Petrov Technology EOOD there're implemented system for social responsibility management, developed in accordance with the requirements of Standard 8000.

The management of Petrov Technology EOOD is committed to creating the necessary conditions for complying with the requirements of the Social Responsibility Management System and for the active assistance of the management, technical and executive staff in its development.
